in Ahmad El Sayed Ahmad

Education

Stiftung Universität Hildesheim, Germany

Apr 2025 – Present

MSc. in Data Analytics

- Courses: Machine learning, Big Data Analytics, Advanced Marketing, Seminar DA I, Information Ethics, Distributed Data Analytics

Islamic University of Lebanon, Lebanon

Oct 2021 – Jul 2024

BSc. in Computer Science

- GPA: 3.13/4
- Grade: 78.18/100
- Participated in the Computer Science CBI program from Réseau Figure (France)

Collège Notre Dames des Soeurs Antonines, Lebanon

Sep 2006 – Jun 2021

Life Science Degree

Internships

MERN Stack and React Redux Developer

Oct 2023 – Jan 2024

Salem Group (mehnnati.org) [🔗](#)

- Explored modern backend frameworks including Node.js
- Designed and implemented relational and non-relational databases using MySQL and MongoDB
- Built and deployed full-stack applications with robust backend logic
- Tested backend APIs using Postman to ensure functionality and performance

Front-End Developer

Jul 2022 – Oct 2022

Salem Group ([GitHub Repository](#)) [🔗](#)

- Explored modern frontend frameworks, primarily React
- Developed responsive UIs using HTML, CSS, Bootstrap, and Tailwind CSS
- Utilized Git and GitHub for version control and collaborative development
- Worked with both Visual Studio and Visual Studio Code environments

Projects

Full Therapy Project Full Stack & Mobile Developer

Apr 2024 – Jul 2024

Faculty of Public Health, IUL (raise-lab.com) [🔗](#)

- Developed backend using Node.js and Sequelize for API integration and data management
- Built frontend web interface using React for a user-friendly experience
- Created mobile application using React Native with Expo for cross-platform compatibility
- Managed codebase with Git for collaborative version control

Machine Learning, Data Science, and Deep Learning with Python

Feb 2022 – Apr 2022

Udemy ([GitHub Repository](#)) [🔗](#)

- Built image and sentiment classifiers using TensorFlow/Keras with transfer learning and regularization
- Applied regression, SVM, KNN, decision trees, and collaborative filtering with cross-validation

- Cleaned datasets, removed outliers, and visualized trends using Matplotlib and Seaborn
- Deployed ML models with Flask to create interactive prediction web apps
- Designed a reinforcement learning Pac-Man bot applying reward-based decision strategies

Front-End Developer – Bootstrap Projects

Independent Projects

(*First Project*) [🔗](#) (*Responsive Project*) [🔗](#)

- Designed responsive interfaces using Bootstrap’s grid system
- Implemented predefined UI components for fast and consistent layout development

Technologies

Data Visualization:

- Power BI
- Tableau

Programming Languages:

- Python, C++, Java, C#, SQL, PHP, HTML, CSS, JavaScript, Bootstrap
- Node.js, Express.js, Sequelize.js, Nest.js, Kotlin, React Native Expo, React

Packages:

- **Python:** numpy, pandas, scikit-learn, matplotlib, keras, PyTorch, TensorFlow, seaborn, Apache Spark
- **C++:** cstring, cmath, iostream
- **C#:** System.Data, System.Data.SqlClient, System.Xml

Object-Oriented Programming (OOP) Concepts:

- Encapsulation
- Inheritance
- Polymorphism
- Abstraction

Microsoft Office:

- PowerPoint
- Word
- Excel

Operating Systems:

- Linux
- Windows

Languages

- **English:** Advanced
- **German:** Beginner
- **French:** Intermediate
- **Arabic:** Native
